

ABHIRAM A KUMAR

+91 97468 62475 — Bangalore, Karnataka — abhiramanil886@gmail.com — linkedin.com/in/abhiram-a-kumar

PROFESSIONAL SUMMARY

Account Manager with Technical Account Management experience, managing corporate clients across India and driving adoption and growth for salary account programs. Strong exposure to backend systems, API integrations, and service-level interactions to support account setup, validation, and issue resolution. Experienced in post-onboarding operations, user lifecycle management, and improving overall user experience. Act as a single point of contact for HRs, founders, and CXOs, ensuring smooth operations, faster issue resolution, and high customer satisfaction. Collaborate with product, engineering, and risk teams to identify system gaps, optimize workflows, and enhance product performance.

EDUCATION

B.Tech in Automobile Engineering, Christ University, Bengaluru

2026

CORE SKILLS

Product Operations, Technical Account Management, Stakeholder Management, Cross-Functional Collaboration, Root Cause Analysis, Backend Systems, API Integrations, Service Coordination, Process Optimization, Escalation Management

EXPERIENCE

Jupiter Money — Account Manager (Technical Account Management), Bengaluru

Nov 2025 – Present

- Led end-to-end onboarding and implementation for salary account programs, onboarding 2000+ users and driving 300 monthly account openings with consistent growth
- Managed 200+ corporate clients across India as a single point of contact, ensuring smooth post-onboarding operations and timely issue resolution
- Conducted implementation calls with founders and HR teams, enabling efficient onboarding and structured rollout of account programs
- Worked extensively on backend systems involving REST API interactions, validating request/response cycles, and retrieving user/account data across internal services
- Performed issue diagnosis using system logs, tracing service-level failures and identifying root causes to support faster resolution
- Collaborated with product, engineering, and risk teams during critical incidents, ensuring system reliability and seamless user experience

PROJECT

B2B Salary Account Onboarding Transformation

- Identified scalability challenges in onboarding workflows driven by manual intervention and fragmented user handling
- Designed and implemented a B2B onboarding model by shifting ownership to HR teams, improving process efficiency and control
- Built a structured onboarding workflow leveraging centralized data inputs, reducing onboarding errors and improving success rates
- Introduced a dedicated onboarding flow for B2B users, improving completion rates compared to standard onboarding journeys
- Collaborated with product and engineering teams to align onboarding workflows with backend systems and tracking mechanisms
- Enabled a self-serve onboarding approach via HR-led communication, reducing dependency on outbound operations
- Maintained consistent onboarding output (300+ accounts monthly) despite team size reduction
